Article published on March 7th 2012 | Acne

If you are looking for an eye cream or face cream with a proven anti aging formula, you are not alone. Millions of women and men search daily for effective cream-based solutions that can help them to look younger.

Just about everyone will notice or realize signs of growing old. This is because the most visible signs are on the epidermis including wrinkles, lines along with dry, uneven or sagging skin. As such, a leading cream product must contain active ingredients to eradicate / reduce these signs or even stop new ones from developing.

Five (5) key active ingredients found in a top anti aging formula today include:

1. Seaweed (scientific name: macrocystis pyrifera)

Seaweed or kelp contains many important nutrients that cleanse one's epidermis and help one to look younger. Its counter-inflammatory properties skin care from growing rough or red.

2. Evening Primrose Oil

Evening primrose oil has a relaxing effect on one's epidermis. Additionally, the skin's shape and texture is maintained with wrinkles prevented.

3. Argireline (generic name: acetyl hexapeptide-3)

Research findings indicate lines and wrinkles as the result of tense facial muscles. Argireline works by relaxing these facial muscles and is one of the most sought after ingredients for an anti aging formula.

4. Hyaluronic Acid

This ingredient acts as a lubricant in maintaining the shape of the epidermis and keeping it moisturized, hence helping one to look younger.

5. Squalene

A natural antioxidant found in one's skin, squalene fights skin-damaging free radicals along with getting rid of infections. This is another great natural ingredient that should be part of any anti aging formula.

By knowing these key active ingredients, you are one step closer in identifying a quality cream-based solution that can really help you to look younger.

If you really desire to regain or maintain that youthful complexion, please note that several leading products can be purchased online. By receiving these online orders directly from the merchant, this option allows you to discretely obtain a really good cream-based product (i.e. one with an effective anti aging formula) that can help you to look younger from home.
