The plumbers from Berwick Melbourne are in fact qualified technicians. Plumbers Berwick is especially skilled in laying of pipelines, maintenance, detection of leaks, solar hot water systems etc. The Melbourne plumber is well trained in the installation of pumping items such as grey water system, rain water system and hot-water systems. They undertake installation, maintenance and repair works in residential as well as commercial buildings. They are known for their workmanship and reasonable service charges. The plumbers of Melbourne never fail to attend to a customer irrespective of the nature and size of the work.

Plumbers Berwick also offers consultation on designing, installations, renovation and maintenance of buildings. The customers can get all their doubts clarified and they will be able to finish the repair works of their buildings peacefully and with confidence. Service of Melbourne plumber is also available for plumbing of new buildings and works connected with gas fittings. The other activities of these plumbers are repair and servicing of gas appliances, water audit, air conditioning and thermostatic valves. They are well versed with statutory guidelines and rebates. The plumbers of Melbourne are committed to conservation of water as well as energy. They are experts in all types of conservation oriented works such as installing tanks to preserve rain water, gray water systems, water saving shower heads etc.

All plumbers at Melbourne have to attend a training program at the Chisholm Institute. As per rules the plumbers will be permitted to undertake work at the construction sites after they complete the training program and obtain certificate III in plumbing. The industry is also involved in organizing the training program. The training program is introduced to avoid shortage of skilled personnel. The trainees undergo practical training at the real work places. They get the opportunity to take part in industrial fairs, contests, seminars and workshops. The course is duly recognized by the industry and facilities are provided for higher studies also. A new Trade Career Centre is coming up at Berwick which is a joint venture of Chisholm Institute and the government.

Training facilities will be provided for a broad spectrum of job oriented skills at the centre. In order to boost local small business ventures, the center provides practical guidance and investment advisory services. The Business Enterprise Centres (BEC) network in which Chisholm Institute also is a member provide investment advisory service, training and support to all local small business units for their development. Information is also provided about starting new business, taking up franchise etc.
