Article published on June 14th 2012 | Business

Irritable bowel syndrome (IBS) is a chronic disorder leads to cramping, changes in bowel movements, gassiness, abdominal pain, bloating and many other indications causes too much irritation and distress. Though, it doesnâ€™t results to a serious illness but cause discomfort for the whole day. Sometime it makes you unable to work, to take proper sleep or attending any event means your complete social and personal life is disturbed.

Can you survive in such worst circumstances? Will you be able to deal with this permanent soreness? Your answer will be no unquestioningly. So from where should you initiate to make your life peaceful? Visiting doctor is always a first preference but you know what it is useless because most of the doctors are unsaid on its diagnosing and causes.

Following are the main symptoms of IBS are:

â€¢ Abdominal pain

â€¢ Bloating

â€¢ Discomfort

â€¢ Constipation

â€¢ Straining and cramping

â€¢ Diarrhea

However, the symptoms can vary from person to person because everyone has unlike immune system that supports your body. During constipation it causes difficult-to-pass, hard or infrequent bowel movements which cannot eliminate any stool, or only a little.

Moreover, when you are capable to accept a bowel movement, it may contain mucous secretion, a fluid that protect and moistens passages in the digestive system. Most of the people during IBS go through diarrhea that causes loose, watery, frequent stools. The symptoms, sometime settled down after a short duration but return with fixed worsening of groundsels with the passage of time.

Therefore, friends if you are tired and left with no solution then try to experience the Functional Nutrition method which offers you a pain free remedies that recover you naturally. This technique usually focuses on the four parameters i.e. immune function, digestion, detoxification, and hormones because their malfunctioning is the main cause of each and every problem in your body.
