Photography- Art of Nature by Buildmann

Article published on July 18th 2012 | Photography

Photography is the science, art and practice of images i.e. durable and recorded electromagnetic radiation or light either chemically by means of a light-sensitive material such as photographic film, or electronically or by means of an image sensor. A lens is used to focus the light reflected or emitted from objects into a real image on the light-sensitive surface inside a camera during a timed exposure. A negative image on film is traditionally used to photographically create a positive image on a paper base, known as a print either by using an enlarger or by contact printing. Photography has many uses for business, arts, sciences etc. Previously photography was very rare popular as there not opportunities available in this field.

Now a day each and every field Photography is very important. There is various form of Photography among which digital photography is the mostly popular. Many people take up photography as a profession looking to its facility and polarity. From past few generations music has become passion as well as dream for most of the human beings. By looking up to the growing interest of every individual various nature photo contest, kidâ€™s photography contest etc is organized. These facilities are provided to each and every individual so that they can come with there upcoming talents. Hence due to all this reasons the value of photography raises through out the world in a very great impact.

Previously the photographs were of black and white due to lack of advanced facilities. But now in todayâ€™s world with the advancement of technologies every photographs provided are colored and of good quality. The uses of photographs is Scientists have used photography to record and study movements, Artists are equally interested by these aspects but also try to explore avenues other than the photo-mechanical representation of reality, such as the pictorials movement. Photography is used by amateurs to preserve memories, to capture special moments, to tell stories, to send messages, and as a source of entertainment.
