Womenâ€™s Shoes - update your look for a new season by Jennifer Winnett

Article published on February 2nd 2012 | Shoes

Put a spring in your step with a new pair of womenâ€™s shoes, one of the easiest ways to update your look for a new season. While weâ€™ve had more than our fair share of wind and rain this winter, it has been unseasonably mild, meaning weâ€™re ready for spring fashion perhaps even a little earlier than usual.

As we head into spring, womenâ€™s boots are still a fundamental part of every womanâ€™s wardrobe. Chelsea Boots and other ankle boots are all great transitional styles that will work with both your winter and spring looks.

However if youâ€™re looking for something a bit different, there are lots of new, distinctive shoes coming in to River Island stores and online. Flat shoes like loafers, brogues and ballet shoes are versatile and practical shoes that never really go out of style, however theyâ€™re updated for the new season with colourful trims, chunky soles and metallic finishes giving a wardrobe staple a fun twist.

Pointed shoes are a key trend for SS12, both in flat shoes and heels. Contrasting colour toe detail gives these new must-haves designer inspired appeal.

If youâ€™re going on holiday or just preparing for summer, then espadrilles and sandals are definitely essentials. River Island has a wide selection of both to choose from in prints, plain, colourful and muted styles so thereâ€™s something to suit all tastes.

Of course other footwear every woman needs is some heels. From wedges to stilettos, there are some gorgeous heels available at affordable prices.

So what are you waiting for? Get shopping and take steps into the new season now!
