The MXF file to FLV Converter for Mac is very powerful and useful just download and try it now!

Key Features:

* Support universal media players and devices

MXF File to FLV Converter for Mac helps you convert mxf file to iPad, iPod touch 4, iPhone, PS3, Xbox 360, Droid X, etc. for well playback. Besides the above mentioned devices, it also supports output files for Samsung Galaxy Tab, WD TV, Apple TV, Media Server, NAS, Zune, Archos, PSP, Blackberry, Nexus One, HTC Droid, HTC Desire HD, Desire Z, Samsung Galaxy S, and more.

* Special focus on High-definition videos

High-definition videos can be compressed to common video or re-coded into other formats and retain HD quality. What's more, deinterlacing facility is provided for eliminating the interlacing lines of HD footage's taken with camcorders.

* Convert animated images to video files at ease

With MXF File to FLV Converter for Mac you will have more fun with animated pictures (GIF image) by converting them to short video files.

* Super high converting speed

Its advanced coding technology accelerates the conversion speed to great extent. With this MXF File to FLV Converter, you can convert videos much faster than other similar tools.

* Ability to merge files together and trim out unwanted clips

With 'Merge into one file' function, video clips can be merged into one file when it is necessary. With 'Trim' function, you can easily cut the selected file to any length and get rid of commercials, titles, header, trailer, etc.

* Capture still images as you wish

The MXF File to FLV Converter for Mac not only lets you preview the mxf video, but also makes it easy enough for you to take snapshot- simply with one click. You may also change the images to favorable format at specified size.

* Advanced audio and video sync technology

The MXF File to FLV Converter for Mac adopted advanced audio and video sync technology, and has improved audio video synchronization to perfect performance.

* Multiple aspect ratios available

MXF File to FLV Converter offers more than switching between 16: 9 and 4:3 aspect ratios, it allows you to set the video to desired value to fit for the screen of your devices and meet your special demands.

* Various watermarks editing options

The program supports different watermarks including text, image (including GIF), and video watermark.

* Auto-shutdown facility

When working with large videos, a lot of time is consumed in producing the final video files. MXF File to FLV Converter conveniently shuts down your Mac on completion, saving valuable power and time.
