Having a Toll Free Number Can Be a Huge Advantage for a Small Business. by Alex Christopher

Article published on January 17th 2012 | Business

Many people have learned to trust a toll free number in the recent years and having one can only benefit your business. Below are five reasons why a toll free number will take your business a step further in the right direction.

Its Portability â€“ One of the most important benefits of a toll free number for a small business is the ability to change the ring to number, this is called portability. If you need to move your business or if your needs happen to change, itâ€™s extremely easy to change the ring to number. Usually all it takes is just an update in your online back office. Itâ€™s a shame that you canâ€™t move your entire business around with such ease.

It gives you that large company image â€“Toll free numbers give even the smallest home based businesses that large and more significant corporate image. If this is one of your main objectives, take a look at the virtual office services provided online because these inexpensive services make it very easy for any business to create an extremely professional large company image over the phone.

You can expand your marketing reach tremendously â€“ A local number is ok and will suffice if you only plan to market locally. But if you want to expand your business and market outside your local area, a toll free number is practically a necessity for any business in the United States. Coming up with a good vanity number is one of the easiest things you can do to give your new startup that successful big company image.

Its Scalability â€“ To further benefit a smaller startup businesses, you basically just pay for the usage or calls to your toll free number. This means that a new or small business with little usage will pay very little for their service and their bills will only increase as their usage and business increases. It would be nice if all business expenses worked in the same way!

Its Ease of use, and additional information â€“ They are extremely easy to use and even easier to set up. A toll free number also provides additional caller information including the callerâ€™s number even if the caller ID information is blocked as well as additional tracking and measurement capabilities. They also allow you to control and change where the calls go on the fly or automatically without having to reprint your literature or change your advertising and flexibility are important especially for small businesses that can move faster and change more quickly.

To conclude, a
