Article published on March 28th 2012 | Business

Because it does not seem like gas prices will go down anytime soon, many motorists are looking for ways to lessen their fuel consumption.For people who are making their very first car purchase, a car with excellent fuel economy has become the number one priority. This is the reason why more people are switching to electric vehicles and hybrid cars.

The history of the hybrid car goes as far back as the history of automobiles itself. However, many attribute the invention of the hybrid car to Sir David Salomon who developed a car ran by an electric motor and heavy storage batteries back in 1870. Hybrid cars are not as fuel-dependent because they get their power from two or more sources. They are basically run by batteries, an electric motor, and a gas-dependent engine which makes it faster than vehicles that are 100% electric, but more fuel-efficient than the average car.

In addition to fuel economy, owning a hybrid car also helps the environment. Because hybrid cars do not entirely run on fuel, there is obviously less toxic emission. Less emission, of course, means less carbon dioxide.

Owning a hybrid comes with a priceâ€”and a high one tooâ€”which is why in spite of the obvious advantages, car buyers still opt for conventional vehicles. One solution to this predicament is to purchase from a used car lot.

The primary concern when it comes to purchasing a used hybrid is that it is hard to come by even in Indianapolis, Indiana where there are several used car dealerships. If you are looking to buy a reliable hybrid car at Buy Here Pay Here car lots in Indianapolis, the choices are slim pickings. However, most likely, youâ€™ll come across one. It is simply a matter of researching on different dealerships.

Before you sign all that paperwork to purchase that hybrid in Indianapolis, make sure you ask about the carâ€™s battery pack. When it comes to Buy Here Pay Here dealers Indianapolis has, buyers should ask them about the warranty and whether it covers the batteries. Replacing the battery pack can be rather pricy, so better make sure that everything is clear between you and your dealer.

When it comes to auto sales and service Indianapolis centers provide, there will always be one for your hybrid. If you are interested to learn more about hybrid cars, you can check out hybridcars.com. Additional information can be found on carpress.co.uk and edmunds.com.
