I See You Through the Network of Law Office Billing Software by Ivon Lerdorf

Article published on April 7th 2012 | Business

Easy Soft TimeBill is all the legal billing software your law firm will need. From individual password log-in to individual billing rates to automated finance charges on past-due accounts, Easy Soft designs legal software specifically for attorneys and their staff.

Just one of the key features of the Easy Soft attorney billing software is its network capability. Within the law office environment, networking is critical for efficient and timely task completion. Computer server technology allows attorneys on different floors and in different buildings to communicate with each other concerning client matters. Our law office software has also developed to the point that an entire law firm can use one program linked in to one database that serves as a network for all of the billing activity of the entire firm.

For the manager of law office billing, the permissions for the network settings within Easy Soft legal billing software allow him or her to see every member of the firm. Is the new associate properly entering time upon return from court? Is the seasoned paralegal using routines within the law firm billing software for daily time and expense entry that will minimize omissions and maximize profitability?

With Easy Soft law office billing software you can also limit the permissions of what data is available on a person-by-person basis. Particularly if you are using the billing software in connection with the trust accounting software, you can limit what is seen on the screens of associates and support staff. Our billing software can put everyone in the firm on the same system, but allow for added confidentialities when and how you find appropriate.

All of our Easy Soft legal software products are network capable, and programs like Easy HUD allow various members on the closing team to input information as it becomes available, sharing the work through the development process to the printing of even the HUD-1. And, all of our products have free trial down loads and a 30-day money back guarantee.

When Easy Soft law office billing software is part of your firmâ€™s work environment, you take advantage of what network technology offers to add value to your bottom line. Why not watch a ten minute video on our Easy Soft website to gain an introduction into the network and other features of our product? The download of the free trial takes only a few more minutes.

Just think, with your selection Easy Soft network-capable legal software, within about fifteen minutes, you could be on your way to Easy Street.
