apexis infrared ip camera from authoritarian camera + Spot auto iris with manual zoom lens + excellent sealing performance dome and sophisticated camera installation bracket Dome Camera. Its biggest feature is the set of cameras, lenses, and install the system as a whole, the design is compact and easy to install.

User will be asked to buy the Dome IP Camera to pay attention to what the Shenzhen Apexis that first look at the image reduction, under the dome is the sphere of small radius of curvature, its uneven thickness or poor polypropylene material production would severely affect the image quality depends on whether the image will be significantly deformed and optical loss, followed by look at the image clarity, color reduction, sensitivity; depends on the power supply, the best DC adaptive or the exchange (24VAC) power supply; depends on the installation ease of adjustment and adaptability.

This section ir ip camera Features:

â˜… 24 Î¦5 14Î¼ the LED infrared light.

â˜… black environment settings, automatically turn on the infrared lamp set.

â˜… power consumption, stable performance.

â˜… night infrared distance of up to 20 meters.

â˜… The red outer dome camera has a classic appearance, wide viewing angle, indoor small-scale monitoring preferred.

Infrared Dome Camera â˜… subsection applicable 24-hour monitoring of a variety of indoor venues such as shopping malls, hotels, schools, residential, and monitoring.

high speed dome Camera With security monitoring a wide range of applications in recent years, the pursuit of debugging easy to install, but also the pursuit of full coordination with the built environment, both beautiful and covert research and development, the television monitoring project widely used. Despite its composition with the gun-camera there are many similarities, such as fixed cameras, dome camera comes with sophisticated protective cover and mounting bracket, the bolt you need to configure the shield. Dome Camera mostly used for indoor surveillance of small-scale occasions, such as the important parts of the entrance channel, elevator cabs. Gun camera of a very wide range of applications, you can choose a different lens, long distance or wide-angle monitor, and a much broader application of the occasion than the hemisphere.

Surveillance applications increasingly broaden Dome Camera With the ease of installation and commissioning, monitoring and concealment, are used in indoor monitoring, such as the ceiling, the light changes without large applications. So far, the changes in the technical performance of the Dome Camera is very large, mainly the camera functions with a high-performance bolt no difference, just miniaturized; auto iris lens, the + manual zoom, zoom range also increases; overall sealing of the dome better performance, especially under the dome, made thin and uniform, better transmittance, optical loss is smaller; mounting bracket more compact mechanical design, the

Network Camera position adjustment is very convenient in recent years has been to see three-dimensional adjustable universal joint-type bracket
