Global consumption of construction machinery is the most active area in few years by Sally

Article published on December 6th 2011 | Advertising

China, India and other Asian regions in the coming years, will become the world's most active consumers of construction machinery area.

Recently, Hunan Province, latest reports indicate that, with the construction machinery industry have been expanding, growing atmosphere of strong competition within the industry. To promote the industry sustainable, stable and healthy development, Zoomlion, Sany, Sunward, Hunan Electric reinstall, Jiang Lu electrical, constant day ninety-five other six companies issued to strengthen the industry self-regulation initiatives, a positive response. Through collaborative competition, continuously improve product quality and service quality.

Active in the local market, often times the fastest growing local businesses. 2000-2020 China's market, success is bound to some Chinese brands become world-class companies, but also Chinese companies to catch up with Caterpillar, Komatsu's best time.

Chinese construction machinery enterprises in the increasingly global market position

The status quo with the Chinese market, China Construction Machinery Business analysts believe that China's construction machinery enterprises have realized that global demand for the transfer of the enormous opportunities for development. Many brands start to seize market share through various means, are also eyeing the new entrants into the business, confidence high. Chinese construction machinery market access to the stealing of money, grab share of seats and seize territory's white-hot competition period.

Increasing the amount of financing, the frequency is also faster

In addition to the headquarters to increase investment, expand production capacity, the main brand in the region but also outside the headquarters of a large-scale investment. The current layout of the eastern region has improved, regional competition, companies have begun to shift to the central, northwestern Xinjiang become a major business investment in the preferred area.

Industrial layout has been advancing the eastern coastal regions to the central

Opportunity and risk go hand in hand, the market trend is irreversible. For the construction machinery industry, now is the time for the real bullets loaded, the next 10 years China's construction machinery industry as it is today bound to Carter, Komatsu such a great company, but the next 10 years is the industry's most competitive time, for many SMEs, the life and death hangs in the balance.

Vico Heavy Industry Machinery Co., Ltd. Zhengzhou is the production, sales mining machinery equipment, processing equipment, industrial milling machine equipment, construction equipment, sand, road stone equipment, stone crusher equipment, screening equipment, transportation equipment, large-scale manufacturing enterprises. Coincides with the "second five" plan, along with the rapid growth of construction machinery, mining machinery industry will be rapid development. Vico Heavy investment has been increasing in all aspects to enhance their core competencies and reputation, advancing toward the rapid development of the team.
