Forever Green Lawns ensuring your artificial grass stays green forever. by Mary Porter

Article published on June 19th 2012 | Gardening

Even if you are not blessed with green fingers you can still have a gorgeous luscious looking lawn with the minimum of fuss but the maximum impact with Forever Green Lawns! We understand what busy lifeâ€™s you all lead and we also understand how important your outside space is , very often it is thought of as another room, a place for entertaining, for the kids to play or simply relaxing.

Natural lawns take a lot of hard work and continuous maintenance with mowing weeding and problems with moss couple this with the fact that our climate in the UK is very often unkind to growing plants and grass, and not all soil types are suitable for grass germination!

We have the solution for you; at Forever Green Lawns we have been supplying both commercial and domestic customers with artificial turf for many years. It is unbelievably life like in appearance and texture as well as being pet and child friendly, in fact many pre-schools and day nurseries are now using artificial grass over natural!

We genuinely believe that we supply the very best in artificial turf, it is manufactured sophistically to ensure easy drainage, it is stain and chemical resistant, will not fade in the sun and allows you the luxury of a beautiful green lawn which we all strive for without putting in any of the hard work.

We supply artificial lawns for supply all over the UK to be installed on a D I Y basis, each package will come with a complete and thorough set of instructions and our team are always on hand to offer advise. For those customers living nearer to our base ie: Surrey, Sussex, Kent, London or Essex we can arrange a full installation service. All of our fitters are highly trained professionals and will carry out the job with minimum hassle as well as very little interruption to your business.

Contact the professionals today for a no obligation quote.
