Article published on April 16th 2012 | Health

A relatively new and path breaking system in orthodontic treatment is the Invisalign system. Especially at the New-York invisalign amazing orthodontic care is provided.

For years orthodontic treatment meant long duration punishment, obscene metallic wires stuffed in ones mouth giving the â€œugly Bettyâ€• look of a popular sitcom. These reasons were enough to drive away image and looks conscious from undertaking orthodontic treatment.

Invisalign is made of two words invisible alignment. Hence a path-breaking treatment modality was introduced with invisible braces. Invisalign consists of clear, removable alternative to metallic braces thus making life much easier for those undergoing treatment. In this system custom made aligners are used which are made up of clear, thin medical grade polymer. Hence, the braces used on teeth are invisible. The system uses 3-D computer technology to formulate patient specific treatment modality.

The advantages of New-York Invisalign are so many.

1) Firstly the duration of treatment is reduced.

2) No wires are employed so patient does not get conscious of social appearances.

3) Also maintaining oral hygiene is easy as invisalign braces do not trap food particles or plaque.

Therefore the New-York Invisalign is a boon to all people with maligned teeth as they can undergo teeth straightening with minimum discomfort.

The dentist for long has been a frightening person to go to. But we all very well know that regular dental visits are a must for any health conscious person. The New York City dentist serves all kind of people with all forms of dental care. There are various reasons for people to visit a New York City dentist.

1) Regular dental check-up-a boon for both the dentist and person. Dental problems can be detected and controlled in initial stages.

2) Cavities-most common problem faced by people. It requires restorative treatment or in advanced cases root canal treatment.

3) Gum problems, bad breath-can be resolved by professional gum cleaning (scaling).

4) Mal-aligned teeth-teeth can by straightened by orthodontic treatment.

5) Extractions-severely decayed teeth need removal. Also for orthodontic purposes extractions are required.

There are various services that the friendly Dentist New York City performs for you.
