# UniLink Inc. are Your Source for Innovative Canon Document Scanner Solutions by 1300golimo

Article published on December 5th 2011 | Business

The demands of doing business within the global marketplace put financial services companies in a position where they must work quickly and with supreme efficiency. In order to accomplish this operational imperative, they must locate the best equipment on offer from the world's leading equipment manufacturers. One company offers a wide array of financial services equipment for their clients to select from such as Epson printers, Semacon coin counters, Topaz signature pads and Canon document scanner solutions and more. In every respect, UniLink Inc. is a leading business partner.

Unilink Inc. is your number one source for a wide variety of financial services equipment. Whether you want a high resolution printer for your office or an MICR check encoder for batch or proof processing, UniLink Inc. can help meet your requirements with a vast catalogue of solutions that features some of the industry's most sought-after equipment.

One of the greatest advantages to choosing UniLink Inc. for your financial services equipment requirements is that the company's in-house team will help you select the ideal equipment for integration within your business environment. You just have to tell them what your business needs are, and the company's equipment experts will utilize their industry knowledge to locate the requisite solution. Truly, UniLink Inc. acts a business partner in every sense.

Sometimes, in organizations that are utilizing older equipment models, machine breakdowns can occur. Why not let UniLink Inc. repair you old equipment? As experts in the field, they can ensure that you equipment is returned to you in a short turnaround time and is back working better than ever before. The company's in-house repair staff will keep your department heads informed along every step of the process, allowing your company a full bird-eye view of the repair process so that in-house teams can prepare for the machine downtime.

Within the company's catalogue, they have an exceptional array of first class equipment to meet a variety of high volume scanning needs. Take a look at their Canon document scanner selection for example, and you'll find a plethora of solutions designed to enhance your organization's in-house document processing capabilities. The imageFORMULA DR-2020U from Canon is one of the leading market solutions for rapid scanning requirements. The imageFORMULA DR-2020U prints 20ppm in full, high resolution color, and is also one of the most user-friendly products on the market today â€“ allowing in-house team members to print documents utilizing simple one-touch operation.

Another recent addition to the Canon document scanner product line at UniLink Inc. is the imageFORMULA DR-6050C production scanner, which has been designed for optimal functionality within high volume scanning environments. The product is capable of 70ppm in black and white, gray scale or color, which means that organizations will receive one of the fastest solutions on the market when they decide to integrate this product within their working infrastructure. And durability is guaranteed with the imageFORMULA DR-6050C production scanner; because the product has been built in adherence to the strict ISO 9001 Quality Management System standards and has been constructed utilizing solid body design and heavy-duty feed and eject trays. Additional staple detection helps prevent machine downtime and keep the organization running to peak efficiency.

Trust your long-term equipment requirements to the team at UniLink Inc. They're the ideal partner to ensure that your business achieves continued prosperity with the latest printing and scanning solutions. Contact their in-house team today to find out which solutions best match your company's

current business objectives.
