# LCD enclosure, the best protection for outdoor digital signage by Mathu Heden

Article published on December 12th 2011 | Advertising

First we have to discuss on the topic what LCD enclosure is then we will discuss on another topic. As the name suggest the LCD enclosure means the great protection for an outdoor digital signage. A LCD enclosure not only protect the digital signage from the dust but it also protects from rain, cold weather, water, sparks, thunder, snow fall, Direct and bright sun light, fog, dew drops and many other natural calamities. Thus we see that it plays a role of safe guard for the LCD screen and many other things. Since now a dayâ€™s electronic outdoors signage are common on highways and road also. We see these also in big malls, colleges, institutions, meetings, schools, high profile marriages and even these are also common in hospitals share markets and other many other important places. These play an important role for information and market. But the main thing is the security of this electronic device. Then we see that LCD enclosure is the best idea to protect the outdoor digital signage. A LCD enclosure is the best idea to minimize deployment prices. It reduces the risk towards our digital signage. If we choose then it is the best solution for safety. The best advantage of using this electrical device is that it can be used in any season. It provides all protection from the weather and vandalism.

LCD enclosure is not new but it has been around 16 years in the world. But recently it has being common. We can use LCD TV with LCD enclosure in worst areas like in excess heat, excess cold and also in excess rain fall. This is now available in almost all sizes. We can choose them according to size of our digital signage. It is shatterproof. LCD enclosure is one of the best business ideas which not struggle in the financial crisis. It is the most inexpensive and comprehensive solution for digital signage. Now a day there is a demand of new unique water proof monitor enclosure. It protects our screen all over the year. The outdoor signage protection business has become a boom in the market ant it is compared to the gold. As the demand of LCD enclosure has increased but its rate has come down. Hence we can say that LCD or plasma enclosure is the best option to purchase.

A LCD enclosure or plasma enclosure is made up of steel. Since it is a weather proof and other natural disaster proof it cost differs 4 more times greater than that of a standard display. In spite of more expensive it has more advantage than a general TV enclosure or plasma enclosure. Purchasing the Lcd enclosure in spite of simple enclosure is the best idea because really it is is costly in comparison to ordinary enclosure but it provides more security and safety even in the worst conditions. And hence we can easily say that LCD enclosure is the best.
