Decorating a small apartment or condo becomes a daunting task as you need to put great effort in picking space saving yet unique furniture. You need to think about style, design, cost effectiveness as well as the space problem. Now, handling all these issues together makes it a daunting job for many small condo owners. But as long you know the secret, the space will not be a big issue for you. People often conceive a wrong notion that buying unusual furniture for a small apartment indicates sacrificing the fashion factor.

With some quick tactics, you will soon learn the way of finagling unusually shaped furnishings which will perfectly suit your small set up. Do not worry about losing out the charm of lofty interior dÃ©cor. The size does not come in between when you have the right knowledge of interior decoration. Never has it been written that each and every house in this world has to be huge and plush. Now, learn those simple little tactics which will let you enjoy doing a fabulous small condo deco with brilliant unique furniture.

Measure twice: Size does not matter, what matters most is measurement. If you fail to measure your room or the unusual furniture properly before buying, you are going to face a big problem very soon. Measure your room twice, thrice or as many times as possible to make sure that the measuring is perfect. Make a detailed list of the different areas in your apartment where you are planning to fix some particular furniture. After all, you cannot afford to invest in buying unusual furniture which is too big or too small.

Make use of the storage space: We often ignore the storage space in our homes. Try to utilize the storage spaces properly and once they are all full, think of new unique furniture. These days, you will find uniquely shaped multipurpose furniture which can be turned into a tea table. Buy a big ottoman and use it for petty storing purpose.

Help yourself with shelves: These vertical lines make our stay at home better and clutter-free. Bookshelves, kitchen shelves, shoe racks or even the modern floating shelves can save a lot of space. Shelves save you from stuffing the small space with plenty of unnecessary furnishings. Modern unique furniture like drop-leaf or bistro table can rescue you from the need of buying separate kitchen and dinning table.

Unique furniture, but not bulky: While you begin your search for the best unusual furniture, never set your eyes for the huge and bulky ones as you have to struggle hard for space. Instead, you should go for the slim and slick furnishings which are just like the size-zero supermodels. Beauty, but not at a cost of space! Choose slim armed chairs over ornate royal sofa set.

Finally, you need beautiful accessories to accentuate the appeal of the unusual furniture. Pick wall frames, paintings or vases matching the color or design of the unique furniture of your small apartment.
