Article published on April 3rd 2012 | Business

Topography is the study of different areas of land in order to draw an accurate map of the Earth's surface with all the elements included, such as water, rivers, mountains, fields, hills and flat terrain. The study of the terrain is required in order to design and build different constructions or acquire highly detailed data of the soil and vegetation in that particular area.

If you like this kind of job and you want to become a topographic land surveyor in Tasmania, then you first need to be a land surveyor and after that you can opt for topography as your specialty. Why is this required? Because land surveyors receive the general information and knowledge in order to perform survey operations and procedures. They will learn how to interpret technical data and how to operate the equipment for accurate results. Afterwards, land surveyors can specialize into topography and start practice this interesting job.

In Tasmania, there is an association called Tasmanian Land Surveyors Accreditation Board which handles and verify every land surveyor, to ensure its maximum capabilities. Professional land surveyors get the chance to become topographic land surveyors if they want to. For those who want to become members of the board, they have to complete a study which will lead to a degree in surveying and then register as applicant with the board. This board will make sure that only the most dedicated and qualified surveyors get the chance to practice this job in Tasmania. Afterwards, you will need a little bit of experience on this field and pass a few examinations and tests. Usually, a property survey will be required for examination, so you need to work hard and submit a good one, if you want to be accepted. Finally, an oral examination is required, so that the board will be absolutely sure that you are a valuable candidate and you deserve to be member of the group.

Becoming a topographic surveyor is not very hard, you only need time and dedication. You will get the chance to learn different new things that will prove useful for you. Also, you will study how to draw maps and mark different fields and areas, design projects alongside with architects and see beautiful and amazing landscapes. Topographic surveyors which take their job very seriously can explore new lands and discover new things. It is definitely a fascinating job and a very rewarding one. You will be paid according to your experience level, but expect nothing less than $45,000 a year.

Topography use very advanced equipment in order to perform horizontal and vertical measurements and also, laser levels for very accurate results. In addition, with the help of those advanced tools you will be able to measure the depths of water and explore vegetation in order to build a precise map. It is up to you if you want to become a topographic surveyor, but be assured that it is a great job for everyone who likes to travel a lot and spend a considerable amount of time in the middle of nature.
