Article published on June 14th 2012 | Clothing

Would you like to take part in some cocktail parties in this hot summer? Then the first question you need to solve is what to wear. A stunning cocktail skirt? An elegant evening gown? Girls maybe pay more attention to the former choice. Indeed, in such a powerful and youthful summer, stylish cocktail dresses will be the best choices. Here in this article, I will introduce some useful information about how to choose the cocktail skirts for your summer parties.

The first one is to make sure what color and fabric you would like to wear. Choosing right color is the thing you should consider. Choose the color that can flatter your body shape and match with the whole atmosphere of the night. It is also very important to choose the right fabric, such as silk, chiffon, taffeta and satin. I strongly recommend chiffon as this fabric is very comfortable in hot days when comparing to other fabrics. You will be quite easy after deciding what color and fabric to be chosen. For example, it is easier to opt for a green chiffon cocktail dress or a blue satin party skirt.

Make sure the right length. The length of cocktail dresses varies from above knee to ankle length, so it is better to choose the most flattering style, which means you should choose the length that suits you best and make you feels comfortable. Normally, girls with small and petite figures prefer to the length above the knee because this style looks very cute and lovable. Girls who are tall also can choose this style to show off their beautiful legs. Maybe you do not know which style is right for you, so just try more styles and find the right one.

Choose one that suits your body shape. I believe everyone knows the importance of the body shape when choose cocktail dresses. Choose the skirt that helps to highlight your best parts and cover the problems parts. For example, if you have pear body shape with wide hips and legs, it is better to choose A-line style with empire waist. This style will help to show off your waist line and hide the wide hips as well. There are also other styles can suit other body figures like hour glass style and apple style perfectly, so the only you need to do is to find an ideal gown to match with your body figure.

The last tips are to find the right accessories. You can choose what you like, but remember it is better to keep simple, or the jewelry will become burden. Good necklines and earring will help you to draw attention to your upper body and face, so try to find ideal jewelry for your skirt.
