Article published on May 14th 2012 | Investing

Are you on the lookout for lucrative investment opportunities where you feel your investment can give you a good return? The equity markets can always be a good source for generating wealth. However, if you really want big returns you may possibly have to think out of the box. It is always sensible if you invest in a company at its emerging stage. As the company grows, so does your money. Therefore, it is not at a bad idea if you can have a look at the alternative investment market. It is a sub market under the London stock exchange.

This is a market, which allows smaller companies to float shares. The regulatory system is more flexible than the main market. This was a concept that saw the light of the day in the year 1995. It raised $24 billion for more than 2200 companies. Therefore, as an investor it is ideal if you can invest some of your hard earned money in good companies here. The growth prospects here can be fantastic. Some of these companies since then have moved up to join the main market. As an investor your job is to identify these companies at a nascent stage and invest in them.

As a potential investor you need to be on the prowl for opportunities. You can also be on the lookout for bmv deals. The word BMV stands for below market value. If you are on the look out for property you will come across people who will offer you property at discounted prices. You must be ready to cash in on such opportunities. You have the option of selling the property later at a decent profit. You can also make good money by renting the property. Hence, if you want to make money you need to keep your eyes and ears open and be on the lookout for such opportunities.
