The Famous Homecoming of Roger Hamilton and Those Imprints on Wealth Creation

by Crowin Smith

Article published on April 18th 2012 | Advertising

It took millions of years for the planet that we live on, that we are so pendent upon, and that we are exploiting to the hilt. And all the dependency, all the attachment as well as all the hospitability that we get from the planet is simply forgotten when we start our journey into the mad world of money, glamour, and riches. At the end of the day when we realize the mistakes that we had made, and much better when somebody else points out the harms that we have done to the planet, all that we have to say is that we are just humans and not infallible. But in the very statement lies the answers to all our problems. It is really important that just as we take care of ourselves and the people that we love and admire, similarly we must take care of the place that is witnessing it all. That place is the very planet called earth that we are living on. To take the discussion onto a higher plane that planet is an intrinsic part of the invincible nature. And as long as we do not pay respect to the nature, we as human race are not going to find success in any of the endeavors that they get involved in. One living being on this planet that is involved in one of the most cheery yet far cut off from the words of natural wisdom understood it. Roger Hamilton is one of those beings who had seen the color of money from as close as it can be seen. He is one of those people who lost millions in the attempts that he made as a greenhorn in the world of entrepreneurs. And a little bit of pondering over the reason behind his failures led him back to the home, from it all started. Roger Hamilton simply used that homecoming into the craft of wealth creation and the rest is history.

The homecoming of Roger Hamilton was solemnized by the theories like the wealth dynamics that have the imprints of nature and the majestic role that it can play in the lives of the people who are the true seekers of wealth and at the same time want to stay well connected to their roots, to their ethics, and to their rectitude. The time that saw the genesis of the theory of wealth dynamics and the time that the theory is being widely acclaimed as one of the masterpieces ever created in the history of wealth creation has seen millions of people become millionaires and that too without digressing from the metaphysical realms into which Roger Hamilton meandered and drew the sweetest of nectars and poured it into the craft of wealth creation.
