Article published on December 5th 2011 | Family

In old days the transactions in any business was done by cash. Now that age has gone and even the smaller business organizations prefer a payment through bank transactions only. This will help them to maintain their accounts promptly and perfectly. Even the government authorities also prefer bank transactions in any business as it will help them too to keep a correct track on the business deals and there are less chances of tax evading etc. So, Thus they can avoid any types of delay in business transactions.

Now the entire world has become a global village and the business transactions have crossed the boundaries of nations. After the development in the information technology, now it has become easy to make the payments through online banking. But there also the problem of bank holidays is there. The bank holidays in usa may be different from the bank holidays in UK. This again may be different from the bank holidays in India. So, it is creating a lot of troubles for the people who are engaged in international trades. They will have to arrange their schedule accordingly. Fortunately various bank holiday calendars are available in the internet with the mention of bank holidays in different countries. This is helpful to those who are into export and import to plan their work schedule. So bank holidays plays very crucial and important role in the business peoples life.

National days and important festival days of various religions are bank holidays in India. The total number of bank holidays in USA and bank holidays in uk are comparatively less than those in India. So it will be the citizens of those countries who are facing more difficulties due to bank holidays than in India. They are not accustomed to this much numbers of holidays. It was the business community who used to face difficulties due to bank holidays in old days. However, even the salaried class is also facing a lot of troubles. Nowadays most of the companies are paying their employees through bank. This will again help them to maintain a clear record of wages paid and also helpful for the employees that they will get the payment in a specific day every month. But, the bank holidays are gain playing foul play here too. Anyway, by the arrival of ATM machines this problem could be solved to a greater extent. Now the bank holidays in india witness a long queue before ATM centers. Thus the negative effects of bank holidays have reduced by the arrival of ATM.

Still there are certain situations which demand our physical presence in the bank. It may be for a loan or for some other purpose. The work will be done only the bank is open. People who are having such works will suffer a lot in bank holidays. Though the online facility has extended to all departments of bank, still they could not end the negative effects of bank holidays as a total to a considerable extent.
