# Samsung Galaxy Pocket: a new Smartphone from Samsung by Sushant-tech

Article published on May 9th 2012 | Mobile Phones

Samsung galaxy Pocket phones have been able to cover a wide market in different parts of the world. With the increasing popularity of Android OS, Samsung has made it a point to incorporate the up-graded Android OS on their gadgets. Now-a-days, Android OS are applicable in high-end, to mid-range, and even entry-level handsets as well. Although it is loaded with an Android Gingerbread OS, these Galaxy Pocket handsets from Samsung are neither a high-end nor a mid-range handset. The phoneâ€™s design has not been very much up-graded. The design of these handsets has the similarity of the popular Samsung Galaxy S. The Galaxy Pocket device is featured with sturdy design and ensures longer service life. Being budget-friendly, these Samsung gadgets are suitable for all sections of consumers.

Samsung Galaxy Pocket is fitted with a 2.8 inches TFT capacitive display touchscreen. The handset comes with a resolution of 240 x 320 pixels and a pixel density of 143ppi. This phone is designed with a premium quality screen display. Fuelled by Android Gingerbread OS, you will be also provided with the option of TouchWiz UI on this gadget. Multi-touch control features are also available with these smartphones. In addition, features such as multiple home screens, widgets, YouTube, and many more can be enjoyed on these Samsung Pocket devices. The Latest Samsung Mobile Phones are loaded with a host of applications including the games like Fruit Ninja game and Angry Birds. It is to be noted that you cannot play these types of games in older models but only on Samsung Galaxy Pocket handsets. In terms of data connectivity, Galaxy Pocket devices are outfitted with Bluetooth version 3.0 with A2DP, Micro USB, GPRS and EDGE. The phone is also facilitated with Wi-Fi connectivity on this handset. This budget phone has every potentiality to provide your full-fledged entertainment facility, which no other cheap or budget-friendly handsets can offer. Due to the presence of Android Gingerbread on these devices, you are able to enjoy advanced features like Compass and Accelerometer sensors. The addition of HTML browser is effective in fulfilling your desire for mobile internet surfing. You can also view threaded SMS messages, E-mail and push E-mail on this handsets without any difficulties. These handsets are featured with GPS with A-GPS applications. If you are very conscious about the sound features of your phone, then this handset has the ability to play MP3 files via headsets or headphones (3.5mm headphone jack) or the phone's loud speaker.

If you read latest Samsung Mobile Phone Review, you can get the detailed picture of the utilities and functions of these Samsung gadgets. These handsets are instrumental in providing much more than just typical and calling. You are provided with the option of surfing the web, playing amazing games and browsing social networking websites also. Besides, these Samsung Galaxy devices ensure an excellent talk-time and music-play time as these are powered with Standard battery, Li-Ion 1200 mAh. Another important USP of these handsets is its price. These Samsung gadgets can be availed at an approximate price of INR 8,000. With more sophisticated features and cost-effective rates, these Samsung pocket device is surely going to meet your demands and requirements.
