Article published on February 6th 2012 | Music

When it comes to the music industry there are a lot of different genres that one can go for. These range from rock and roll to electronica and Hip hop. All of these music genres have different sound beats and a variety of different instruments are used for every kind. If you are an aspiring musician and want to make it big in the industry then you have to practice for hours during a day. Practicing means working on the vocals if you are the singer and playing the instruments if you are a drummer or a guitarist.

When it comes to Hip hop music, all we have is a singer and some beats playing in the background. The vocalist has to spit words and try to rhyme them together so that the vocals fit with the music or the beats. This genre is a difficult one for the vocalist as he has to work out a lot on the sounds and how he sings the lyrics. Rap beats are equally important for the singer as they are the ones that set the musical background for the vocalist to perform on. These beats can either be created or you can also find them online.

If you are thinking of buying a hip hop beat online then there are a lot of web music stores that can help you with the requirement. All you need to do is search the right type and you will have hundreds of rap beats listed on the screen. Then you can pick the one that suits your lyrics the best and pay the site for the service. Most of the beats available online are jazzy and created by music professionals. You can also be sure of the beat that you are going to buy as you can hear the demo of all the beats that are available for you.

Unlike the music stores wherein you get beats at super expensive prices, the beats available on certain hip hop sites are extremely affordable. You can get a superb hip hop beat for just five dollars as well. Once you have bought the beat you can use it in any way you like, you can use it for one of your songs or you can share it with your friends. So if you are thinking of becoming a big rapper someday, better start with beats of your choice and fill the lyrics accordingly.
