Construction in Northern China - Key Trends and Opportunities to 2016 by Bharatbook

Article published on July 21st 2012 | Real Estate

This report provides detailed market analysis, information and insights into the construction industry in Northern China, including:

- Overview and analysis of the construction industry in China

- Overview of the construction industry in Northern China including historic and forecast values for residential, commercial, industrial, institutional and civil engineering/infrastructure building construction

- Historic and forecast construction industry values for the following regions in Northern China: Beijing, Hebei, Heilongjiang, Inner Mongolia, Jilin, Liaoning, Shandong, Shanxi and Tianjin.

- Detailed market sizes for overall Chinese construction for a period of ten years (2007â€“2016), including category level (construction output, new construction, repair and maintenance, refurbishment and demolition) data by construction activity and by cost type

- Profiles of the top construction companies operating in the market.

Summary

Over the forecast period, Chinaâ€™s infrastructure development is expected to be key to the growth of the countryâ€™s construction industry. Specifically, in response to the countryâ€™s rapid urbanization, the Chinese government plans to invest CNY7.0 trillion (US$1.03 trillion) into infrastructure development from 2011 to 2015. Moreover, the country is a preferred destination for foreign investors and manufacturing companies due to the high availability of cheap labor, with levels of commercial construction therefore expected to continue to rise over the forecast period. However, the Chinese construction industry may find it difficult to attain international standards due to continued controversy regarding forced land acquisition, poor construction quality, and corruption.

Scope

This report provides a comprehensive analysis of the construction industry in Northern China:

- Historical (2007-2011) and forecast (2012-2016) valuations of the overall construction market in Northern China

- Region specific historical and forecast construction industry valuations for Beijing, Hebei, Heilongjiang, Inner Mongolia, Jilin, Liaoning, Shandong, Shanxi and Tianjin

- Breakdown of values within each project type at the overall country level, by type of activity (new construction, repair and maintenance, refurbishment and demolition) and by type of cost (materials, equipment and services)

- Assessment of the competitive environment using Porterâ€™s Five Forces

- Detailed profiles of the leading construction companies in China

Reasons To Buy
