Article published on April 2nd 2012 | Fitness

If you are experiencing some significant change in your ability of eating, then you need to consult with your doctor. In the modern days, people have started realizing the importance of beautiful teeth for their personal charisma and lifestyle. There have been great advancement in the field of dental-implant technology and if you are suffering from the problem of missing teeth then you need not worry for the same because Harley street clinic is there to help you out. This is one of the leading dental clinics in, London, which is specialized in placing teeth implants.

When you are going for teeth implants then they are originally titanium roots to which an artificial tooth is attached. The dentists across entire London use the latest dental implant technology, which performs the procedures as smoothly and painlessly as possible. Such clinic in London utilizes the modern computer imaging technology, which shows to the patients that how their teeth will appear once the treatment is completed. If you will consider teeth implants then it consists of three stages - the teeth implant, the abutment and a holding screw as well. When all these three components are assembled together then it can be approximately two centimeters in length.

Dental implants are available in various shapes and sizes, which enable our dentist to find the best solution for every patientâ€™s individual needs. Anesthesia is used to perform dental surgery in order to provide pain free surgery to the patients. Harley street clinic is the topmost priority in dental clinics and other medical facilities as well over the entire London. The foremost feature of this clinic is to provide the best level of comfort to the patients. They also provide pain free solutions to the people and the patient comfort is under close surveillance when talking of such clinics. These clinics provide three-dimensional images of a patientâ€™s dental anatomy. They in turn provide precise and clear information about jawbone density, location of the tooth roots and exact position of the nerves, which will help a lot during the surgery.
