Article published on March 21st 2012 | Gardening

Having your own fruit trees in your backyard would be a dream come true. Besides beauty and shade, fruit trees provide you with plump, healthy fruit that you never have to worry about being chemically sprayed. Many gardeners think that growing fruit trees is complicated. You may even doubt that you have enough yard. What you will be amazed to learn is that fruit trees are relatively easy to maintain, and come in dwarf sizes. Dwarf fruit trees make it possible to have gorgeous greenery and fresh fruit even on your apartment patio.

If you are a new gardener, or only have a small yard space, then dwarf fruit trees are right for you. With only about 8 feet of space, you can have a high bearing produce tree. Many of the dwarf trees can actually be left in potted containers. Dwarf trees can grow right off your apartment balcony. This makes it possible to have great small trees in any landscape.

Most dwarf fruit trees are relatively easy to plant. It will be crucial to know what type of fruit grows best in your location. A professional from a nursery in your town should be able to give you the greatest advice. Some fruit trees are easier to care for, and grow better than others. A couple examples are dwarf apple trees and dwarf persimmon trees. Their size makes them simpler to prune and harvest, making them just right for a new gardener or busy homeowner. Dwarf fruit trees give the same size fruit as regular trees.

Some fruit trees do best in places with a mild climate. Areas like California are great for plum trees. Harsh winters and summers are difficult for these trees. Persimmon trees are hardy and can take on almost anything, while apple trees have bark problems. Dwarf trees demand full sun and lots of water.

Do not miss your chance to enjoy a gorgeous fruit tree in your backyard garden or landscape because you donâ€™t think you have room for it. A dwarf fruit tree will bring you stunning foliage and plump fruit for very little maintenance. Get help from your neighborhood nursery to ensure your dwarf treeâ€™s success. This is the smartest way to find out what your dwarf fruit tree will require. Soon, you will have your own delicious fruit growing right in your yard.
