Industrial display Manufacturer from USA for your requirement of rugged LCD displays by John Anthony

Article published on December 12th 2011 | Hardware

These rugged industrial LCD displays are manufactured to be able to function efficiently in such a milieu. There are many a Industrial display manufacturer from USA who make good quality rugged industrial LCD displays.

Rugged Industrial LCD displays can be of different sizes ranging from 12 inches to 42 inches. Bigger sizes as required can be custom-built by the manufacturer. They can have wall, ceiling or bench style mounting depending on their use. Using rugged LCD displays increases the life of use of monitors saving money and effort of replacement.

Design features of Rugged Industrial LCD displays

â€¢ Steel and stainless steel are used for construction of rugged LCD products for corrosion resistance

â€¢ Where dirt, dust, moisture and water are likely to be present, protective and toughened glass is used to protect the LCD display monitor.

â€¢ Provisions are made to make public display LCD monitors shock and vibration resistant.

â€¢ Most Rugged Industrial LCD displays are environmentally sealed for complete protection.

â€¢ Wide viewing angles may be required for LCD displays in public places like malls.

â€¢ Crisp colors are a requirement that makes the LCD display attractive in a public place.

â€¢ Certain Industrial standards are observed during manufacture of rugged industrial LCD displays that ensure safe and efficient use when used indoors or outdoors.

â€¢ Some LCD displays that are used outdoors have features that make them readable in sunlight.

â€¢ Rugged Industrial LCD displays can have remote controls for adjustment of brightness during different time of the day or night.

â€¢ There could be a touch screen facility put in for displays that are for interactive public use.

â€¢ There could be a small PC installed at the back to upload or alter displays.

Many a Industrial display manufacturer from usa specializes in the manufacture of custom LCD displays for heavy Industries such as petrochemical, pharmaceutical, power distribution, machine tool and food processing. Military and naval applications include avionics suites, flight simulators, naval flight decks. In America, medical equipment displays such as radiological CT, NMR, MRI, and XRay monitors falling into the category of Industrial LCD displays and can be custom designed by Industrial display manufacturer from USA with features to withstand required conditions.

I also found what we really needed; rack mount servers that functioned properly at 45 degrees centigrade. That is the temperature that is many times reached on our shop floor where the new Rack Mount Servers were going to be installed.
