Article published on August 14th 2012 | Health

With age comes experience & also a lot of changes in physical appearances. Though you will be the same person inside, outer appearances undergo a change that comes on gently as you live your life to the fullest. We humans however enjoy beauty & youth and no amount of age defying tactics are enough for us. While importability is still far away, science has enabled us to at least remedy the signs of ageing. Face neck lift is one such procedure that allows us to bring back a few years in our looks if not life. The QuickLift is a revolutionary face lift procedure that tightens skin in the lower portion of the face and neck in a minimally invasive way. The QuickLift mini face lift, developed by renowned cosmetic surgeon, Dominic Brandy, MD, delivers impressive results similar to a traditional lower facelift with a lower likelihood of complications and a quicker recovery. Just donâ€™t delay visit today to New Life style clinic for latest Face neck lift.

Laser hair removal works by destroying the base of the hair follicle and source of new hair growth using pulses of light. After a treatment session, the hairs will fall out. Laser hair removal was performed experimentally for about 20 years before it became commercially available in the mid 1990s. Now a days the efficacy of laser hair removal is generally accepted in the dermatology community, and laser hair removal is widely practiced in clinics, and even in homes use devices designed and priced for consumer self-treatment. Laser hair removal treatments are an FDA approved method for permanent hair reduction, but not permanent hair removal. It requires multiple treatments to have the best results. New Life Style Clinic offers you only use advanced FDA-approved lasers to safely and gently remove unwanted hair from most areas of the body including legs, face, back, underarms and bikini-line areas. like other lasers their equipment can be used on any skin type - from very light to very dark skin. To satisfy the customers and to deliver best ever possible results at the Clinic they use safe and proven Candela ND:Yag laser, Ellipse Intense Pulsed Light (IPL) system and the latest in hair removal - StarOne Super Charged Alexandrite which has an additional skin cooling device to make the Laser hair removal process an enjoyable procedure; plus it is excellent for treating very fine hair or those that been resistant to other lasers.

Hair loss has become a menace now for peoples, facing day to day life struggles there are many causes of scalp hair loss, and they do differ in men and women. Studies show that losing up to 100-150 hairs per day is normal. Human hair naturally grows in three phases: anagen, catagen, and telogen. Anagen is the active or growing phase. Catagen is a fairly short phase of the natural hair cycle during which hairs begin to break down. Telogen is the resting phase. The hairs that are shed daily are often in the resting or late phase in the hair cycle. Normally, about 10% of the scalp hairs are in the resting or telogen phase at any time. These hairs are not growing and are getting prepared for cyclic shedding. Best hair loss treatment are offered in New Life Style clinic they offers the treatment for hair loses. Without wasting much of your time just visit today to our site to make the most of it! And make your get rid of hair loss problem with our Best hair loss treatment.
