Panasonic Lumix Fs30 Review- Offers Great Benefits with an Auto Intelligent Mode

by Rogelio Johanson

Article published on February 2nd 2012 | Technology

There is a lot of Panasonic lumix fs30 review that is available right away for you. But all of them state the same thoughts of reviews. It is because this Panasonic fs30 is indeed a unique device that can really satisfy every user. As you buy this product, you can feel nothing expect from being impressed with its quality, features, and itâ€™s all around performance. A very exceptional auto intelligent mode is very ideal for people who feel unsure about what settings are best and let the camera to take care of everything. It has also enough settings as well as different modes for people who are more confident and happy to play around with it. Moreover, it also produces a number of fantastic quality photos.

Another thing that is emphasized in our Panasonic lumix fs30 review, it also speaks about the colours that are very sharp and crisp together with its zoom feature that are certainly impressive. Even though a user makes a camera a fully zoomed in, the result of the picture is still in good quality. Since this fs30 has a dinky side, it makes ideal for carrying around but some users may experience a hard time to hold and operate it especially those who have a larger hands. This type of camera has 28mm wide-angle lens that allows you easily to capture large groups of people indoors and even the generous architectural structures as well as the scenes with a large width. The 8x optical zoom lens is also very impressive because it can capture wonderful shots of people as well as landscapes together with its 14.1 megapixel resolution.

Talking back about the intelligent auto mode, which it is also stressed out in our Panasonic lumix fs30 review, four detection functions work all together and automatically to optimize your setting. By that, it makes it easier than the other cameras to take magnificent pictures anytime. It also includes MEGA Optical Image Stabilizer to detect even the hand-shake. It has also an intelligent optical image stabilizer control to detect faces in the frame as well as the intelligent scene selector. The menu system of this fs30 is clear and very easy to navigate with a lot of features for you to mess around with. That feature includes different scene modes and good news is you can let the fs30 take care of the details. More often than not, most of the people found it worked very well like this.

The screen of Panasonic lumix fs30 is also clear and it definitely performs well enough. And with the different features available, people nowadays can get a great photo out of this camera and just view them on the built in screen. Since it produces a high quality photos, you donâ€™t need any more to view it on your television or monitor. Furthermore, even though there are times that this camera demonstrates a number of noises, it shoots crisp and clear HD video. The best thing about this camera is it has a better macro.

Rogelio Johanson - About Author:
Hi, I'm Rogelio but you can call me Roger. A review specialist about different cameras. As far as being a review analyst, a Panasonic lumix fs30 reviews that I have read from other review specialist are all positive. It has the same usage as the new version of the Lumix but has a lower and cheaper

price. An impressive camera that has all the best functions. Try to use it and see the great results. Thanks!
