Article published on May 7th 2012 | Health

â€œWe are what we eatâ€•, the proverb in itself says everything. Our health is determined by the eating habits. The changing eating habits and lifestyle of the cities have led to many disorders in health. The main reason is obesity. Though many people try to regulate their eating habits for effective weight loss but are not able to maintain it for long.

The main reason for this is the rapid change in the society, lots of eating outlets and our daily schedules which does not allow us to have proper meals on time. More and more people have become health conscious these days. Even youngsters are very active and doing various things to maintain their good health. Obesity has become a major threat and can become a reason for various diseases.

Diet is an integral part of the treatment of obesity. Those who are overweight can call up a Dietitian for weight loss without harming your health. In order to be healthy it is important to eat the right type of food which suits oneâ€™s age, sex, and body type and disease condition, if any. There is a different healthy balanced diet for each age group. No two individuals are alike and therefore, their needs of the nutrients vary and so the diet plans have to be individualized. Again for the same person also the requirements are different during various phases of life.

Dietitians is someone who supervise the preparation and service of food, develop modified diets, participate in research, and educate about good nutritional habits and is responsible for the eating habits of the patient. Major cities have been attacked by the problem of obesity. Delhi is one of them and thus dieticians in Delhi are popular among the people for amazing diet plans provided by them. They have team of skilled and knowledgeable doctors who give the advice according to the individualâ€™s health and need.

Dieticians in Delhi are attracted by people from every part of the city who are health conscious and willing to lead a fit and healthy life. Dietitians are keen to bring the latest science-based food and nutrition information on topics that masses care about. They provide tips for healthy living and often act as stress busters. They guide a person as to what to eat and what not so as to maintain an ideal weight and also have a proper nutritional status in order to avoid any chronic diseases. With lots of people thronging to the nutritionist in Delhi, it is clear that they have been able to fulfill their objective and creating a healthy life for the patients. They have experience of varied exposure and practice throughout the length and breadth of India.
