Are you planning to undergo plastic surgery? Not able to find a good doctor? The best solution is to search for plastic surgeons in India online. India is emerging as one of the best and the cheapest destination for plastic surgery and other medical and health related facilities. You can browse various websites and make list of good surgeons for your purpose. All you need is be clear what kind of surgery you want and what kind of doctor you are looking for.

You should search many websites to find a good doctor and a good clinic. If you don't want to go at remote destinations for the plastic surgery then you can search for doctors or clinics nearby your place too. There are numerous websites available today but they all cannot be termed as the best plastic surgeons anywhere. So you need to know how you can identify a genuine and experienced one from pseudonyms. Here are some steps which can help you distinguish a good plastic surgeon in India from others.

What you have to search in the website?

When you are done with the preparing a list of doctors or clinics nearby your place, you will now have to gather necessary information about them which helps you to finalise the doctor. You will have to follow few steps while gathering information about the doctor or the clinic:

- 1 Look out for the patients' feedback and testimonials about doctor or clinic on the website. This will give you some idea about their service and expertise. Patients who have undergone surgery under that particular doctor can only give you a clear idea about the surgery and also about the doctor.
- 2 Check patients' reviews about the doctor. Some websites publish patients experience and their point of view. Read them carefully to get idea about everything. You can also ask the clinic to provide contact detail of some of the patients whom you can talk to.
- 3 Some websites even have rating system based on the patients' experience. This rating system will help you to short list one of the best doctors nearby your place.
- 4 Checkout the details about the clinic. You will have to find out how well equipped the clinic is before taking up the surgery.
- 5 Find out about the surgery and number of procedures involved in the surgery. This will help you to be mentally prepared for the surgery.
- 6 There are some fake websites and fake doctors too. Be aware of such people and such websites. Do not take an instant decision getting lured by low fee or tall promises. Make a thorough investigation first.
- 7 Last but not the least find out about the fee structure. Different doctors charge in different ways. So it is better to be clear about the fees before you enrol for the surgery.

Try to communicate with the doctors or institution to experience the way they treat their customers. This will also give you an idea how they will treat you later. Remember a single decision can make or break your life.
