When it comes to using and enjoying hot tubs, Kitchener spa owners understand the importance of choosing energy-efficient Jacuzzi spas and preparing for freezing temperatures in the winter. In addition to starting off with an efficient spa, buying hot tub parts can boost energy savings and extend the life of the spa. Here's what you need to know about hot tub parts in the area:

Invest in a hot tub cover, preferably with a lift system. Properly covered Jacuzzi spas require less energy because less heat is allowed to escape between uses. Hot tub covers are must-have hot tub parts in colder climates. By choosing a cover with a lift system, you'll be much more likely to use it because the cover is much easier to handle.

Invest in a floating thermal blanket. These hot tub parts reduce heat loss and evaporation, lowering energy bills and chemical costs while also extending the life of your hot tub cover.

Stock up on supplies and chemicals for hot tubs. Kitchener hot tub retailers offer a wide variety of hot tub parts, supplies, and chemicals including thermometers, filters, shock treatments, water testing kits, and more. By having everything you need on hand to test and maintain your hot tub, you'll be less likely to procrastinate.

Hot tub parts and accessories to have on hand include:

Water test kits and strips â€“ To test water quality.

Hot tub chemicals â€“ To ensure water quality

Sealants â€“ To repair minor leaks.

Spa cleaners and protectants â€“ To maintain cleanliness and extend the life of hot tub parts such as covers.

Spa filters â€“ To ensure the water quality of hot tubs.

Kitchener spa owners should also refer to their hot tub user guide to understand all recommended preventative maintenance tasks. Just as cars require regular maintenance, the same is true of hot tubs. Kitchener hot tub service providers can perform the maintenance for you or you may be able to do it yourself. When replacement hot tub parts are required, make sure to use the approved hot tub parts so that you don't inadvertently void the manufacturer's warranty.
