Questions to Ask Before Choosing the Size of your Chicago Homeâ€™s Swimming Pool

by Cathy Newman

Article published on June 7th 2012 | Home Improvement

Although there are several public beaches operated by the Chicago Park District along the metropolitan waterfront, there are times when you want to spend a quiet weekend at home with your family and lounge by the pool if only you had one. If youâ€™re not attracted by the limitations and disposability of an inflatable pool, construction materials and technology enables builders to make swimming pools to accommodate every familyâ€™s needs and specifications.

Other than the design and shape, choosing your poolâ€™s size is an important decision that you must make. You donâ€™t need acres of land to have a satisfying pool, but what you do need is an expert builder who can make the most of your homeâ€™s space and lay-out. When thinking about the dimensions of your homeâ€™s future aquatic space, here are some questions that you must consider and ask yourself:

How much is my allotted budget?

Donâ€™t spend beyond your means, or you might end up with a pool yet no money to spend on water and maintenance bills. If you have limited funds, the best option would be the affordable above-ground pool. Although it has few features, has limited size, and is less durable than more expensive pools, this type of pool can provide a small family with an afternoon of fun in the summertime.

Who will be using the pool and how will they use it?

You might state that you want a really big pool, and your kids might even second that statement. However, if you only want a huge pool because your little shakers demand it, it might not be a good idea to give in. A number of Chicago swimming pool service crew and builders know that a kid will enjoy a 5-meter long pool as much as a 10-meter long pool.

However, if your children are training to become athletes, or you also want to do laps in the pool, makers of custom swimming pools in Chicago recommend a pool length of 25 meters and depth of at least 4-5 feet. If you want to a pool for both athletic and recreational purposes, you can opt for an â€œLâ€• shaped pool. Customizing pools is not as hard as it used to be.

How much space do we have?

Of course, a Chicago swimming pool service and building company wonâ€™t build an 8-feet wide pool in a 4-feet wide space. They make sure that you will still have sufficient yard space around the pool. They will balance your poolâ€™s measurements and design to complement your house.
