Choosing the Most Important art supplies for your Drawing Works by [Sophia Miller](#)

Article published on May 29th 2012 | [Art](#)

A lot of new and budding artists are busy finding out what would be the best art supplies for them to begin with. Here you will find some useful information on all the crucial art accessories that you could possibly require including pencils, drawing paper, blending materials, erasers and others. Purchasing the right accessories will make all the difference if you are hoping to become a successful artist.

Graphite pencils can be found in various grades that start from 9B, the softest of them all to 9H, the hardest ones. The different types of these art accessories are filled with coloured, charcoal, pastel and off-course graphite. Softer graphite pencils contain less clay and they are darker compared to the H graphite pencils.

Your choice of drawing papers should be as crucial as the choice of pencils. When it comes to choosing these particular art supplies there are various types available. Make sure that your choice of papers is acid-free and it has the perfect thickness and weight to match with the type of art you are going to work upon. For example, smooth papers are ideal for sketches where you don't need to do finished drawings.

There are different blending art accessories available that you can also use when you are drawing. You can use facial tissues, blending stumps or even q-tips. Facial tissues can be used to generate extremely smooth shading. Whereas blending stumps are cylinder shaped drawing accessories with tapered ends, made from firmly rolled felt. Make sure that you have stumps in various sizes. The stumps can be kept sharp by using some fine sand paper. The good thing about Q-tips is that you could already have them in your home, and they are ideal for creating smooth shades.

Erasers are also invaluable as part of your art supplies. For those occasional mistakes, you must have various types of erasers with you. Kneaded rubber erasers can be moulded into any shape you want. An eraser stick is of great help when it comes to erasing finer details. You can sharpen it as per the thickness needed.

After completing your drawing of course you will want to keep it protected. Fixatives are the art accessories that would help preserve your hard work. Many artists use hairspray in order to fix their finished drawings. However, a good fixative would be the ideal option if you want to keep your drawings preserved for longer.
