We all are very well familiar with Apple's iPod and iPhones. It is equipped with so many features and useful applications and its touch screen enables us to easily do tapping-typing-dragging-scrolling-and even drawing. Generally we use fingers for working on touch screen iPod and iPhones but there is one drawback of operating it with fingers, using fingers leaves finger prints on it. Even when we operate it with fingers then we are not able to control it properly especially when we use it for drawing and writing purpose. It is because of the plumpness of our fingers. Fingers canâ€™t accurately point out our desired function.

To remove all these problems of touch screen devices Stylus pen has been introduced. It is just like a normal ball point pen which is used to accurately point out the correct option. Stylus pen are very easy, effective and funny to use. So mostly people now prefer to use these stylus pens to operate their touch screen iphone or ipod instead of using their fingers. Stylus pen lets you draw, scroll, type and drag easily by its capacitive stylus pens. Apple has recently launched its new stylus pen for its iphone devices i.e. iPhone Stylus. It is desgined especially for all ranges of Appleâ€™s iphone such as iphone 4s, iphone 4, iphone 3Gs, iphone 3G.
