Because at such a important point ,you will never have a second chance to attend your wedding. Once it is screwed up by the wedding suits, it might become a lifelong regret.

Renting a suit/tux usually costs around $100, so if you ever need a suit again, even once more, it's paid for itself. Since it's likely that you will probably have to wear a suit again, at least one other time in the next 10 to 20 years (like if you ever have to attend someone else's wedding) it seems like a worth while investment. Every man should have a nice suit in their closet, just in case.

When you are using the wedding suit rented, you should take good care of it. The price of renting might not be very expensive, but the cost of compensation is very expensive. When you recive the suit ,you should check it at once in case it has been damaged and explained it clearly to the company.â€™
