Article published on May 16th 2012 | Auto

Buying a used vehicle can be daunting to say the least. Can you trust the dealership or previous owner you're buying it from? Today in 2012 very few people have an idea what a Mercedes 170S is all about. Most of them have never even seen one. Mercedes-Benz has always been competitive and had an active racing presence over the years, which has helped with the company's car development and design. If you are awe of this Mercedes model, you can now acquire it easily online. There are some remarkably well reputed online portals where you can check order and customize cars according to your needs. Before you order your Mercedes online, do make a call to the concerned company to find the kind of services and support that are ready to offer.

A Porsche car is a beautiful piece of engineering and craftsmanship. Porsche is a German automotive company, named after its founder, Ferdinand Porsche. Ferdinand Porsche got his official start in 1933 when he developed and created a Grand Prix race car. It produced its 10,000th car in 1956 and showed no signs of stopping. By 1995, the one millionth Porsche was assembled, and the company added to its list of accolades the right to call itself the producer of the world's lowest-emission car. Today, buckhead GA Porsche is still a top ranking manufacturer because of its dedication to quality and innovation in the automotive industry.

Ferrari luxury sports cars have always had a special affinity with the association of not only the racing world and upper echelons of the Formula One Grand Prix, but also a popular choice for the rich and famous. Ferrari constructed its first road car in 1947. The 1947 125 S Ferrari had a 1.5 L V12 engine and the whole car was considered very beautiful and well designed. Today, FIAT controls 56 percent of the Ferrari stocks. The rest of stocks owned by Enzo's con Piero Ferrari and by Commerzbank, Mediobanca and the Lehman Brothers.

Maserati is a luxury Italian sports and racing automobile first made in 1914. Maserati was the first automobile company in the world, through ITCA, equipping its product cycle with a robot for seaming the hood and doors which ultimately minimizes errors and provide better parts shape and geometry at the same time. In 1999, Ferrari took over part of the ownership and brought it back from the brink of bankruptcy. Today, Maserati is back under Fiat's control. With the current economic gloom, Maserati will either have to make something cheaper for the consumer to buy or close shop.
