Genius Pro Can Print Canvas Up to 58â€• Tall for the Largest Canvas Prints in Australia by Elizabethquiben

Article published on December 21st 2011 | Marketing

Genius Pro now offers the largest canvas prints in Australia. With our humongous 60â€• tall printer, we can print up to 58â€• tall on our canvas prints, and as wide as you need. Genius Pro is the wholesale arm of Genius Printing, one of Australiaâ€™s leading canvas printing companies. By creating a separate specialised arm for all bulk and wholesale orders, those after a cheap canvas printing service donâ€™t have to sacrifice quality and service.

Genius Pro now offers deals on canvas prints offering up to 60% off the cost of our canvas prints. If you need professional prints of images on canvas at super cheap prices, youâ€™ve found the right guys: Genius Pro. Our printing isnâ€™t just for bulk or reseller orders. For canvas printing orders of less than fifty, we are able to offer great wholesale prices. You can order one canvas print or ten and still great great rates on a high quality product.

Genius Pro are able to customise your canvas print order from the type of wrapping printed on the sides of your canvas print. You can upload your own photo or image through our easy-to-use online uploader. Our team will create and send a soft and hard proof before we print your large canvas prints order to make certain that you are 100% happy with the product you are ordering.

We aim to bring this same level of service to all of our Genius Pro customers, and weâ€™re the same team, so you know youâ€™ll get great service. If youâ€™re a photographer looking to place ongoing orders we can custom pack your product in customised branding boxes, with your own photography studioâ€™s stickers and tags, and ship it direct to your client! They will receive the print the same as if you handled it yourself. Or we can send it to you first to see the product â€“ this is the incredible flexibility we offer.

We have taken the incredible service of Genius Printing and offered the same flexibility our professional customers. The large canvas prints themselves are of a great quality, and we can send you a sample before you buy so you can compare the Genius Pro product directly with the Genius Printing product. Whilst a Genius Pro canvas print is not printed onto Canson canvas, the canvas is made of woven polyester - textured, thick, and long-lasting. The material does not need lamination. Instead, we apply a specially formulated coating that makes ink dry underneath the coating in the printing process. This coating also provides all of our photo canvas prints with strong UV protection.

Our prices are unbeatable. For bulk orders, prices for a small canvas print (6â€•x 6â€•) begin at $15 for a print, and this doesnâ€™t include the incredible customisation options you can get with your order. When we say customised we mean it â€“ we can customise nearly anything about your printing order, from where we send your prints to whether you would like your canvas prints shrink-wrapped or branded stickers placed on the frame for a professional branded look.

Genius Pro offers a perfect combination of the two opposite sides of the canvas printing industry â€“ high-priced professional giclee printing labs, and bargain basement re-prints of cliched images. We provide the incredible prices of the cheaper online companies, but also provide the top-notch service and communication traditionally associated with boutique canvas printers. How do we manage this? With outstanding systems and simple yet comprehensive online ordering that keeps costs down and customers informed. We can of course answer all your questions over the phone, and provide live tracking on all your orders.

So if youâ€™re looking for high quality, low cost canvas prints that are rich, vibrant and bright, we can

cater for your needs like no other. Creating a high quality print synonymous with the Genius name is just the start.
