Motorola BACKFLIP price, Motorola BACKFLIP reviews, Motorola mobile price by Wenddymadden

Article published on January 16th 2012 | Mobile Phones

Recently launched Motorola Backflip is the first Android phone on AT&T, concluding it the last American carrier offering the phone supported on the Google's operating system. The phone turns up in flair and style, presenting the form factor that has been never seen before. Major attraction is what it explains, keyboard is completely uncovered from the phone back each times, and while flipped open, divulge touch sensitive keypad at the back of the phone along with the QWERTY that looks at you. Other features that must be highlighted incorporate the HVGA screen of about 3.1 inch, camera of around 5MP facilitating LED flash. Talking in the software terms, the Android perfect build is emphasized over social networking i.e. MOTOBLUR.

The flip phone Motorola Backflip supports complete QWERTY keyboard, there is also a feature of the inventive Backtrack touch navigation feature along with the camera of about 5 megapixels with 4X zoom. At the moment, it is the only Android OS supported smartphone accessible from AT&T Wireless.

Talking about the design and the build quality, it is definitely better. The screen flips around from behind the keypad. The reverse flips nature allows quick access to the keypad. The phone is tall and narrow, but quite thick. The moment you will flip around the display, Backtrack beneath display gets exposed. This has come as the best feature in to the phone; in spirit the touchpad assist you scroll the web pages, starting from item to item within the menu. In terms of the display, the touchscreen of about 3.1 inch gives out the resolution of 480 x 320. The display is not at all bad; there is an OLED goodness. Similar to the latest phones. The keypad is pretty well; the keys are placed well with perfect separation in between the keys. Keys are large in the sense that if you want to let go your suppositions and type, you can do pretty fast and truthfully too. The backlit keys make it easy to be used in dim light circumstances. Motorola mobile price are generally low, so you donâ€™t need to worry. Though we are aware of the reality that mobile price in india are pretty competitive.

Motorola BACKFLIP reviews says that in spite of the extraordinary design, Backflip is quite normal in several respects. When the phone is closed, headphone jack and power button will get displayed on the top, while the camera shutter buttons and the volume keys along with the charge/sync port is on to the right side, phone left side is hinge for keypad, and the bottom edge of the phone has got no buttons or ports. At the back, you will find QWERTY keyboard along with camera lens & flash. The cover of the battery is at the back of keyboard. Motorola BACKFLIP price is quite surprising.
