Article published on January 12th 2012 | Mobile Phones

Motorola is on a great build these days, this time they have come up with QUENCH XT5, which can be considered as the elder sibling of QUENCH XT. The phones are quite similar leaving the fact that XT5 has got the fixed focus camera of around 5.0 megapixels in place of the 3.2 megapixel camera that the XT3 has got. The phone even supports the inbuilt FM radio, the feature which is lacking in XT3. The phone supports the capacitive touchscreen of about 3.2-inch offering the resolution of about 320 x 480 pixel resolution. In addition to the Qualcomm MSM7227 processor of 600 MHz and the RAM of 256MB, the phone supports the inbuilt memory of 512MB. There is also the microSD card that allows for further memory expansion. The phone accompanies 2GB card and the memory can be expanded up till 32GB. Further the phone supports Bluetooth v2.1, GSM 3G, HSPA, A-GPS connectivity and Wi-Fi 802.11b/g. To conclude, it is operational over the Android 2.1 Ã‰clair.

With the launch of this phone, it appears that Motorola want to be the Android top dog, for achieving the title they are not just coming up with the remarkable high end smart phones such as Atrixes, but even the phones that take into consideration the wallets of potential buyers. In terms of the design the candybar XT5 has got cool and the calm looks. The external part is made of matte black finish along with the chrome dash bringing in good measure. Front is glossy residing Gorilla Glass encased screen of about 3.2-inch that offers the display of 320x480, which means that the quality is pretty high. Beneath the display, there are four basic touch-sensitive buttons, there is also incorporated the call answer/end keys. The top has the power button with the audio jack of 3.5mm; left side has the flap micro USB port. The built quality of the phone is quite well or you can say itâ€™s very solid. The light weight is another advantage, in all the design is pretty good.

Coming to the feature and the performance, the XT5 is supported with the Qualcomm MSM7227 processor, clocked at 600MHz. with 600MHz processor, the phone operates estimably. Touchscreen is responsive even at the time of the multi-touch, even the accelerometer is responsive and distinguish incline speedily and perfectly. It will not be wrong to say that the design is well built. In terms of the media, the video player that XT5 supports is decent, since the screen is really good. The Motorola Quench XT5 price will definitely please you, as it is being priced really well in comparison to the features it offers. Further it will more helpful if you can manage to read Motorola Quench XT5 reviews. It is true that the mobile price in India is pretty high, but the Motorola mobile price doesnâ€™t fall into that category.
