Few characteristics of a perfect wedding album with trends popular among wedding photographers now by Jessica Williams

Article published on February 10th 2012 | Photography

Every wedding is different, and it is this difference in terms of people, locations and the weather that make wedding a challenge for wedding photographers as well. Digital cameras have changed significantly we approach wedding photography today, yet basic rules of excellent photography still remain the same. As part of a great wedding photography collection, one can follow a relaxing and natural â€œreportageâ€• style. Modern reportage, black and white, & spot-colour photographs should be ideally included in each individually designed wedding album.

It is customary to have attendance included at the brideâ€™s home before the service, the ceremony and at the reception in a great wedding photography package. For a more exhaustive album with more shots, one may stretch the length of time a photographer stay at the reception.

A conscientious couple will create better inspiration and job satisfaction for the photographer, and this in turn creates a better rapport. Photos should have coverage of home, ceremony and reception. The trend in wedding photography at present is for more candid/informal shots. The images caught are fun to do, watching and capturing marriage attendants as they talk, laugh, drink, meet and mingle with each other. The ideal time for such photos is just after the ceremony, when everybody is excited about meeting and congratulating the bride and groom and seeing all their other friends and relatives.

We also suggest going for a choice of Bellissimo coffee-table book/printed book style album or handmade, book-bound album. It is also recommended that you have DVD slideshows of your wedding.

It helps to have an online glimpse of samples of black and white and colour portfolio of the past works of studio whom you are going to assign the job of wedding photography. Wedding photographer ideally should also maintain a rich library of wedding albums: skillfully crafted marriage albums with examples of album page layouts.

After the wedding, you should be having an opportunity to view a slideshow of the shots taken. From these, your selection, plus any framed/textured prints, regular reprints and parents albums can be ordered. You should also be given discs of the proof files to keep and to pass amongst your family and friends.
