Article published on April 20th 2012 | Recreation

The newly launched Horton crossbows have instantly been liked by the crossbow hunters. Itâ€™s a whole new experience for them. The design of the latest version is somewhat unconventional and also complicated to some extent but it actually enhances its accuracy and firmness than its previous versions. More and more crossbow hunters are using these latest crossbows and love them a lot. Even proletarian hunters can try horton crossbows to enjoy the whole new happening.

The newer varieties come in exciting looks that increases the joy of using them even more. Any veteran hunter will surely appreciate it the moment he grabs it. Owing to its low weight, itâ€™s easily portable and handling is too simple. The hunters will always stack them while they go on hunting. If you look into the deeper nuances about it, you can easily find out the reasons of its growing popularity. The jumbo sized forearm design is coupled with Monte Carlo patterns. This allows the resting of your arms at a certain degree of inclination with the trigger of the bow. This whole new feature makes the act of hunting even for stress-free and enjoyable. Any hunter will surely like to add a Horton crossbow to his collection.

The whole satisfying experience of hunting with the Horton crossbows can backfire on you if the bow is not shaped accurately. For a seasoned hunter, itâ€™s just a walk in the park to aim and hit a target with it which is 40 feet away from him. Whether youâ€™re sitting or standing while throwing it, its accuracy is beyond any doubt. Some important facts about the horton crossbows will help to verify it properly before buying it. The weight of it is around 175 lbs, the thrown bows can attain a speed up to 325 ft/sec, the bow is about 12 Â¾â€• long etc.  You can balance the whole bow in one hand with no trouble.
