Article published on April 18th 2012 | Auto

An excellent place to start while choose heavy duty trucks or light duty trucks is to do a good assesment of all your needs. If you do not want to carry a lot of weight with the truck, then you don't need to get heavy duty trucks. The medium duty ones will do just fine. If you are not going to travel with a huge cargo like construction debris, manure, or dirt, then you can get something like an SUV or minivan. It is a much better choice. You should keep in mind that it costs much less for renting a truck than buying it. Hence, if you are going to need a truck only for some time of the year, then renting on is better than buying one out right.

If you are going to use the truck as a family car and work horse together, then it is recommended that you get crew cab model or extended cab one having four doors. Pick up trucks have a lot of permutations and hence there is a lot to choose from. There are a lot of choices for the engines as well â€“ you get to choose from the smaller four cylinder ones to V8s, V6s and there are also the big diesel models. There is a big range of price accoriding to what you choose. You can look at what the market has to offer and get the one that suits your tastes the best.

If you are looking for Heavy Duty trucks, Medium duty trucks, Light duty trucks then the best brand names that you should look for are Chevrolet/GMC and Ford. They are the biggest sellers and their products are famous all over the globe. Next in line is Dodge. The brands from Japan don't have a really big role to play when it comes to making trucks. The companies like Honda and Nissan don't have a big number of truck sales in the international market.

While buying Heavy Duty trucks, Medium duty trucks, Light duty trucks, there are a lot of different configurations to choose from and hence you should sit back and think about what you need and what you don't. These automobiles differ in terms of reliability, safety, performance, comfort, fuel economy, and price. If you are going to attach a heavy trailer to your truck then you will need a heavy truck or else the trailer might not move at all. The fuel economy is directly related to the power, size, and weight. If these three factors are big then they will have some impact on the fuel efficiency of the automobile. Heavy trailer will need a heavy truck and the fuel efficiency will be adversely affected. If the truck is heavier, then it will ride worse.

When you are looking at the Heavy Duty trucks, Medium duty trucks, Light duty trucks, it is really imporant to get something that you need well. You should resist any temptation of overdoing things. Some might find it really convinient to carry extra bit of towing and cargo capacity.
