Article published on June 29th 2012 | Auto

There are certain industries that find heavy duty wheels useful in their day to day work for its durability. It is these features in wheels that has made them most sought-after item among these industries. Take for instance, the ability of these wheels to withstand excessive loads is enormous. They are resistant to extreme weather conditions, making transportation an easy task.

Availability of heavy duty caster wheels in different types such as swivel, fixed and lockable makes it perfect for industries to select according to their need. Each type has its own amazing feature. For example, heavy duty caster ensures quick rotation. It makes it perfect for situation that warrants unidirectional movement. Likewise, the swivel variety is first choice when greater flexibility is warranted.

They have amazing load capacity especially in the rubber, polyurethane and nylon heavy duty casters. Use of superior qualitative raw materials such as plastic, rubber and sheet metal is responsible for this characteristic. Manufactures make sure their use of raw materials conforms to standards set by the industry. The sturdiness achieved makes them perfect item to be used for construction purpose for optimum performance. Warehousing, surgical and automotive applications find great help from use of these casters.

These casters are result of some great engineering work done that is evident from presence of a ball bearing in it. This helps in hassle-free movement during transportation. This advantage offered by it has been applauded by industries which use it. Adherence to standards set by regulatory authorities make them safe and secured. It helps in avoiding a lot of mishaps and accident taking place during its use. These casters are perfect to be used in strenuous and dusty terrains where some of these industries are located. They have capacity to bear extreme temperatures, cleaning solvents, steam, abrasive chemicals, etc. Stainless steel, aluminum and carbon steel are preferred to imbibe these qualities in a caster.
