Article published on February 17th 2012 | Auto

Whether you are planning to attend the next meeting in May or have an abiding passion for motor racing in general and this track in particular, there are many places where you can find out more about this fascinating venue. Dozens of books have been written on the subject of Formula 1 racing over the years and many of these refer to this famous European track, recounting stories of some of the events that have occurred during races held there throughout the years.

Any racing driver that has ever competed at this street track will have plenty to say on the subject and will probably have fond memories of the place. If you are not keen on shelling out hundreds of pounds on beautifully illustrated books just to find out more about the place and the track, the Internet is a good place to look for basic facts. There are websites that focus on each seasonâ€™s action, which are geared toward those that actively follow the sport, and those that discuss the grand prix Monaco circuit and other tracks that have been a feature of the Formula 1 calendar for many years.

Websites with information such as the length of the track, record laps and a picture of the layout are easy to find and because there are quite a few of them, it is not difficult to crosscheck any data that you come across. DVD stores that specialise in sporting events may well have interesting footage of past races that you can buy to get a better idea of what it feels like to drive round the track at high speed. If you do not live near to a large store, you can browse the selection of DVDs that online retailers have for sale these days.

With all the modern technology that we have in the 21st century and the instantaneous nature of the Internet, it is easy to forget that your local library may well be a good source of information on the racetrack in Monte Carlo. If the books that they have on the subject are too few in number or too old, it is worth taking a look at the latest magazines to see if any cover the place in detail.
