Know the basics of Drag Racing by Randy James

Article published on July 5th 2012 | Auto

Drag racing is played at many places of the world and it is very popular in USA. Drag racing is a sport that is played or performed with the help of cars or bikes. It is a form of auto racing and the rules of this racing are very simple the route chosen for the racing in usually a quarter of a mile. Two vehicles are raced, if the area of the road is broad cars are used, or else bikes are used to play. Both the vehicles race each other in high speed and the first one to reach the end line is the obvious winner.

In order to take part in drag racing, it is necessary that the car parts are changed to drag racing parts. Normal car parts wonâ€™t be of much help in this race as high speed and torque is one of the prime pre requisites of this race. Drag racing parts are available in many car shops and garages for purchase. If your budget is low, you can also install used drag racing parts just to perform in a few races. Drag racing events are very entertaining, and a large number of spectators gather around to enjoy the thrills of his race. The speeds of the cars are high and the roar of the engine will make you feel as if you are about to watch a vehicle war. Superchargers or nitrous oxide are used in these cars, to give it a high boost of speed. The blowers in the cars are restricted to 8, so the numbers cannot be increased.

Drag racing is a great spectator sport as it makes for excellent viewing with scintillating stunts and the light show that is visible when the cars are at high speed. Though it is a little dangerous, but what is fun if there is not a little danger involved in it?
