Bridge Baron Computer software from The Bridge Shop is the worldâ€™s most popular and user-friendly bridge game. Available for PC or MAC, Bridge Baron offers a variety of features designed for both play and bridge tuition.

Users can play single hands, play team games against the computer or participate in any of hundreds of built-in real-life tournaments and compare their scores from those actually recorded in actual tournament play.

Bridge Baron is ideal for improving players, as the system will offer a hint if the player doesnâ€™t know what bid to make or card to play â€“ and the user can also replay a hand at any time if they think they can improve their play from earlier. Plus, players can practice any of the over 100 built-in conventions using the Deal Generator.

On-line play with Bridge Baron is also a feature â€“ family members can play over a local home network or you can connect and play with friends over the internet.

Players can also input their own hands in Bridge Baron, such as those theyâ€™ve played at their club or seen in a book or newspaper column.

Overall, Bridge Baron is an ideal way to practice or improve your bridge, or just simply spend some time playing by yourself against the computer.
