Article published on May 2nd 2012 | Auto

When the Ford Model T made its debut in 1908, it quickly gained popularity in the car industry. In 1925, Ford made another car based on the Model T, in which it had a flat cargo bed behind the cabin, as well as a heavy-duty suspension. It was named the Model T Runabout, historyâ€™s first mass production pickup truck.

Itâ€™s not very hard to spot a pickup truck from the millions of cars in the worldâ€™s roads. They have tha iconic cargo space at the back to carry more weight than what other cars can. Pickup trucks are also built to be tough with a heavy-duty chassis, as all that extra weight needs a chassis that can provide extra support. Pickup trucks find their utility in hauling heavy loads such as:

Tools and equipment: Small businesses and utility firms put pickup trucks to good use in carrying their gear to the site. Modern pickup trucks can carry as much as one short ton or 2,000 pounds of tools, equipment and other cargo. Bear in mind that the gross weight of a pickup truck also includes you, the driver and the passengers apart from the cargo.

Aside from carrying more load, pickup trucks also excel in carrying big and wide cargo like boxes and ladders. It is widely used by home repair and maintenance contractors that specialize in roofing, plumbing, pest control, etc. The handyman needs every tool if he is to provide quality service to the millions of people residing in the Ontario suburbs.

Trailers: Ram trucks Durham car dealers sell up the ante by towing a full-size trailer, perfect for a getaway to the mountains. Trailers can be hooked onto the pickup truck and the latter will use its powerful engine to tow the heavy load from the bustling city to the pine trees. Refer to the manual of the pickup truck to determine how much weight it can tow.

Used trucks Ajax car lots offer are versatile enough to be used in any way you please. A pickup truck can carry heavy loads from one point to the other; or it can tow your mobile home or even your fishing boat to your forest getaway. Donâ€™t worry about how much stress it can handle because these cars are designed for the hard and gritty.

If you want to know more about how pickup trucks made by GMC Ajax Durham residents drive around can carry the weight for you, visit online resources like Wheels.ca. You can also consult government agencies for more information on regulations on carrying heavy loads.
