Article published on December 6th 2011 | Auto

When it comes to buying your car insurance without a doubt the cheapest deals can be found online, this is simply due to the fact that companies who sell car insurance online donâ€™t have the overheads that high street companies do or have to have large amounts of staff and so can pass these savings onto you by offering cheaper premiums and incentives.

Not only can you get the cheapest premiums but you can do so all from the comfort of your own home, you are able to shop online at a time that suits you 24/7. Along with this you can also take full advantage of being able to get almost instant quotes and also compare a huge range of premium costs with a lot of companies at the same time. By doing this you ensure that you get the policy that you need while making the most savings. Another added benefit to shopping online for your car insurance is the amount of information you can find when it comes to the many different types of policy available.

The type of policy that you buy for your car insurance covers you for exactly the same as it would had you bought it from the high street, the only difference is that you make savings. When making a comparison check for the cheapest premiums it is essential that you make sure you know what the policy involves.

Some companies throw in incentives to get to sign with them such as offering free breakdown cover for a specified amount of time or similar offers and this is where you are able to make the biggest savings.

Bear in mind that if a policy is exceptionally cheap them it will probably only cover the very bare essentials and somewhere in the small print it could state that you will have to add additional cover. This is when the cheapest isnâ€™t always the best, as having to add on cover can boost up the premium considerably.

Before making comparisons for premiums you will of course have to know what type of car insurance you require and of course what that cover will give you. There are two main types of insurance and these are fully comprehensive which is the most expensive as it generally covers just about everything and third party which covers for incidents such as the theft of your car.

There are many other additional components when it comes to car insurance and you would be wise to check the options that are available. Of course the cover you need will depend on such as your age, type and size of car and how old the car is.
