Staying One Step Ahead of the Weather by BusinessDealer

Article published on December 31st 2011 | Auto

But there is a way to beat the summer in Strathfield, and all the other weather that sometimes gets thrown our way in New South Wales. Itâ€™s called a Jeep. All the 2011 models were designed with comfort as a major priority. Jeep knows, from seventy years of experience, that comfort behind the wheel is a major factor in making great cars. And when it comes to Australia, that means keeping you cool and protected from the elements.

The Grand Cherokee is available with dual-zone Automatic Temperature Control (ATC) allowing you to adjust the temperature in two different areas of the car. Thatâ€™s definitely a plus if youâ€™ve got kids the back complaining about it being too hot or even your gran moaning that itâ€™s too cold.

But itâ€™s more than about top-of-the-range air-conditioning. The Grand Cherokee is also available with ventilated front seats, which will keep your whole body cool on those days when any part of your body will stick to anything. And if you do want to open the windows to let nature try and cool you down, the power windows mean you wonâ€™t have to work up a sweat winding them down. And itâ€™s n just convenient windows that let the fresh air in. The available CommandView sunroof is a panoramic, dual plane power sunroof thatâ€™s perfect for those days when the sun isnâ€™t beating dowr but providing glorious light.
